Обогащение речи учащихся средствами инверсии

Аннотация. Статья предлагает материал по одной из наиболее сложных и, тем не менее, слабо освещенной в школьном курсе английского языка теме – «Инверсия». Предлагаемый комплекс упражнений предусматривает различные виды заданий на отработку данного грамматического явления в разнообразных контекстах и предназначен для учащихся старших классов, а также для лиц, углубленно занимающихся английским языком.

Ключевые слова: английский язык, комплекс упражнений, инверсия.

В современном поликультурном мире инструментом общения представителей различных культур выступает коммуникативная иноязычная компетенция. Одним из ее компонентов является умение говорящего выражать свои мысли, адекватно используя разнообразные языковые средства с целью выделения релевантной информации [1]. Экспрессия в языке может иметь место во всех языковых формах: в фонетике, грамматике, лексике, а также в словообразовании и т. д., но в данной публикации мы остановимся на инверсии.

Инверсией в английском языке называется вынос в начало предложения логически выделенного слова или фразы, в результате чего сказанное ставится перед подлежащим. Инверсия в английском языке имеет несколько функций. Грамматическая функция проявляется в различении коммуникативных типов предложений. Логическая функция заключается в выделении в речи того или иного слова для указания его значимости в предложении; экспрессивная – в выделении всего высказывания в целом для придания ему эмоциональной окраски. Связующая (дискурсивная) функция инверсии необходима для выражения непрерывности мысли в предложениях, следующих одно за другим.

Таким образом, использование инверсии значительно расширяет возможности как говорящего, способствуя достижению им цели своего высказывания, так и слушателя, помогая ему понять истинный смысл сообщения [2]. Вместе с тем на сегодняшний день школьная программа по английскому языку не предусматривает специального изучения темы «Инверсия» и, следовательно, вопросы обучения экспрессивной речи являются недостаточно методически разработанными.

Важность рассматриваемой проблемы послужила основанием для составления лексико-грамматических упражнений, направленных на поэтапное освоение материала: от языковых заданий к речевым. Представленные упражнения охватывают широ
При организации работы в классе учителю необходимо обратить особое внимание на следующие специфические трудности усвоения темы «Инверсия». Хотя инверсия – это нарушение общепринятого порядка слов, случаи ее употребления ограничены жесткими рамками, поэтому следует предостеречь учащихся от использования свободного порядка слов в своей речи. Инверсия бывает полной и частичной: при полной инверсии все сказуемое стоит перед подлежащим, при частичной – лишь его часть (вспомогательный или модальный глагол), а смысловой глагол – после него. Кроме того, в ряде случаев, например в предложениях, начинающихся с наречия времени со словом only, с обстоятельства, имеющего отрицательное значение, инвертированный порядок слов употребляется в главной части сложносочиненного предложения. Также отметим, что если подлежащее предложения выражено личным местоимением, то сказуемое в некоторых случаях может ставиться перед подлежащим, в других же случаях это совершенно недопустимо.

Более подробную информацию по теме можно найти в учебниках практической грамматики, указанных в списке источников [4–7]. В конце статьи мы также прилагаем ключи к большинству языковых и условно-речевых упражнений.

The ship on which he travelled was very old and it was shipwrecked in a storm. The passengers jumped into the water with their bags in their hands. Simonides was carrying nothing and somebody asked him where his bags were. The poet answered that he was carrying with him all the riches which he had.

Many people died in the sea. They had their bags in their hands and could not swim well. But some of the passengers reached the land and went to the city near the coast. Their bags were in the sea now and they had no money or clothes. They walked in the streets of the city and asked people to help them.

A rich man who lived in that city knew Simonides’s poems and liked them. When he saw the poet in the street, he asked him to his house and gave him clothes and money.
